

Down East FY22 Outputs (Number/Counts):

Number of child care teachers/family child care providers/directors served: 115

The Child Care WAGE\$[®] Program provides support services through salary supplements. This number reflects the number of active participants in Down East expected to receive a supplement for completing at least one six-month commitment period during FY22. The output is based on participation rates using the FY21 eligibility requirements. The individuals who are not anticipated to remain eligible due to the need for increased education have been removed from this estimate. This output assumes funding to cover at least the active participants at the time of proposal submission. If funding for new applicants is provided, additional early educators may be paid.

Percentage of sites with email addresses on file targeted with recruitment/outreach activity:
100%

WAGE\$ will engage in at least one recruitment activity with 100% of eligible sites in Down East with email addresses on file at the time of recruitment. Primary recruitment activities are conducted by email, though multiple methods may be pursued if funding is available for new applicants. The licensed centers and homes that will be targeted are based on those with email addresses on file that are serving children ages birth to five according to the Division of Child Development and Early Education. Child care homes already participating will not be included.
